SMARTVID COVID-19 PLAN

4 STEPS TO JOBSITE MITIGATION WITH AI

1. CONNECT YOUR SITES

Remotely visit your jobsites from anywhere

- Integrate all project photos using Smartvid's direct connections to Procore, BIM 360, Oracle Aconex, Box, Egynte, StructionSite, & more
- Or, let us provide inexpensive site camera packages that work with WiFi or cellular

2. AUTOMATE OBSERVATIONS

Log, track and correct all observations

- AI automatically detects workers not social distancing or clustering in groups of 10+
- Also identifies other leading indicators:
  - Missing PPE (masks, gloves, safety glasses)
  - Ladder Safety & Workers at Height
  - Housekeeping, & more

3. GET ALERTS & REPORTING

Generate automatic alerts for COVID-19 risks

- Daily reports auto-generate to help managers reward compliance with social distancing, mask-wearing, & more
- Immediate alerts identify areas of the jobsite where mitigation tactics can be improved
- Status reports show impact to key stakeholders

4. MEASURE COMPANY-WIDE TRENDS

Executive Dashboard summarizes activity

- Each project is assigned a Risk Score to easily identify and rank areas of need
- Risk Scores include COVID-19 mitigation plus other safety categories:
  - Phase of Construction
  - Slip & Trip Hazards, & more
